Ttukttak Vibe Workshop Student Worksheet

Lesson 1 Small problems into apps Front

Date _____ Group _____ My nickname _____

Today's task Pick a small everyday problem, change one quiz message, and say why.

Opening 5 min → Activity 30 min → Wrap-up 5 min

Open mission When a choice meets the answer

First address to visit https://gmlduqzhd123-lab.github.io/Vibe-for-U/

1 Whose problem will we solve?

Who will use it and why they need it

_____

_____

2 Set the build promise in my words

What should show up when I click

_____

My first one-sentence request

_____

_____

3 Predict before you click

What I'll do	Message and score I expect
Click the answer I think is right	
Click a different answer	

☐ I checked the promise ☐ I wrote my prediction before running

Lesson 1 Small problems into apps Back

Date _____ Group _____ My nickname _____

Write what you predicted and what you saw separately. Leave anything not seen yet as not checked yet.

4 Write the results you ran yourself

What I did	Actual message and score
Pick right answer	
Restart, then pick wrong answer	

5 Change one message and check again

The sentence before and after

_____

_____

Why I changed it

_____

_____

Result when I did the same thing again

_____

6 Today's explanation and saving

What I clicked → Rule I checked → Value it remembers → Screen result

_____

_____

☐ I recorded actual results and check status ☐ I checked device save or file backup

Lesson 2 Describe it clearly Front

Date _____ Group _____ My nickname _____

Today's task Make the build request clear: users, features, special cases, and done conditions.

Opening 5 min → Activity 30 min → Wrap-up 5 min

Open mission When a choice meets the answer

1 Reread your first request

Lesson 1 original or current request

_____

_____

2 Make it clear with six questions

Who will use it?

_____

What problem will it solve?

_____

What will they click or type?

_____

What result should appear?

_____

What about repeat clicks or restarting?

_____

What check means it's done?

_____

3 One condition to add

Condition to add

_____

Lesson 2 Describe it clearly Back

Date _____ Group _____ My nickname _____

Write what you predicted and what you saw separately. Leave anything not seen yet as not checked yet.

4 Compare the edited requests

Compare	Before	After
Features and results		
Repeat clicks or restart		
Done conditions		

5 Two checks I made

Action to try	Expected result

6 Tell the request from the app's rules

If you only change the request, does the app screen change too? What I saw:

_____

_____

Setting to check to change how it runs

_____

☐ I kept the original ☐ I saved versions before and after the edit

Lesson 3 Inputs and conditions Front

Date _____ Group _____ My nickname _____

Today's task Predict how choices link to scenes, try both paths, and explain.

Opening 5 min → Activity 30 min → Wrap-up 5 min

Open mission My choice makes the path

1 Predict the results of both paths

My choice	Scene I expect
Toward the big tree	
Toward the sunlight	

2 Write the paths you tried

Sentence I chose	Scene I actually reached

After one path, click Back to start and try the other path.

3 Explain why the scene changes

My choice → Link rule → Current scene the app remembers → Screen result

_____

_____

_____

Lesson 3 Inputs and conditions Back

Date _____ Group _____ My nickname _____

Write what you predicted and what you saw separately. Leave anything not seen yet as not checked yet.

4 Fix one thing

A choice or scene text to make clearer for friends

_____

_____

Why I'm changing it and the link to keep

_____

_____

5 Check both paths again

Path I chose	Expected scene	Actual scene
Tree side		
Sunlight side		

☐ I saw both endings ☐ I can go back to start ☐ There's more to check

6 Explain choices and links

How is a choice's text different from its link to a scene?

_____

_____

☐ Fix reason and check record ☐ Version or file backup

Lesson 4 Values the app remembers Front

Date _____ Group _____ My nickname _____

Today's task Find score, question number, and answered state; compare before/after restart; fix the reset rule.

Opening 5 min → Activity 30 min → Wrap-up 5 min

Open mission A clean restart

1 Find the values the app remembers

☐ Score ☐ Question number ☐ Already answered or not

One reason this value is needed

_____

_____

2 Write the values that changed as you play

Get two right to build a score, then record it. Don't restart yet.

Value it remembers	At start	After all questions
Score		
Question no.		
Answered		

3 What happens when you click Restart?

I think score will be ___ question no. ___ answered ___

_____

_____

Lesson 4 Values the app remembers Back

Date _____ Group _____ My nickname _____

Write what you predicted and what you saw separately. Leave anything not seen yet as not checked yet.

4 Check the actual values after restart

Value it remembers	Actual value	Same as my prediction?
Score		
Question no.		
Answered		

5 Fix the reset rule and recheck

Check and fix the score reset rule for restart. Answer questions to get a score, then restart.

After fix: score ___ question no. ___ answered ___

What changed from before and why I fixed it

---

6 Explain the values the app remembers

Why only showing the first question isn't enough

☐ Before/after reset record ☐ Recheck after fix ☐ Version saved

Lesson 5 Be a bug detective Front

Date _____ Group _____ My nickname _____

Today's task Repeat the double-score bug, fix one rule, recheck, and explain why.

Opening 5 min → Activity 30 min → Wrap-up 5 min

Open mission Huh? The score keeps going up!

1 Today's build promise

On one question, when and how many times should the score count?

_____

_____

2 Click the same right answer three times

Action	Expected score	Actual score
1st click		
2nd click		
3rd click		

3 Briefly write the problem you found

When did it happen?

_____

How was the actual result different from the expected result?

_____

_____

☐ Auto check ☐ I checked it myself ☐ Not checked yet

Lesson 5 Be a bug detective Back

Date _____ Group _____ My nickname _____

Write what you predicted and what you saw separately. Leave anything not seen yet as not checked yet.

4 Fix one rule

Scoring rule ☐ Every click → ☐ Once per question

What I changed and what I kept

_____

_____

Why I changed to this rule

_____

5 Check again with the same actions

Action	Expected score	Actual score
1st click		
2nd click		
3rd click		

My call ☐ Same as expected ☐ Needs a fix ☐ Not checked yet

6 What should the app remember?

What to remember to stop double scores, and why

_____

_____

☐ Version before fix ☐ Version after fix ☐ What I saw and why

Lesson 6 Building with real AI Front

Date _____ Group _____ My nickname _____

Today's task Students set the request, prediction, and checks; the teacher builds with outside AI; we watch and write a fix request.

Opening 5 min → Activity 30 min → Wrap-up 5 min

Open mission When a choice meets the answer

1 Pick roles for real AI building

Students set the request, prediction, and checks. A teacher or adult builds and runs it in an outside AI tool. We don't paste outside code into this workshop.

App to build and who will use it

_____

2 Build request for the teacher

Include features, results, repeat clicks, restart, and done checks.

My build request

_____

_____

_____

_____

3 Plan your checks before running

Action to try	Expected result
Pick right or wrong answer	
Click same answer again	
Restart	

☐ No real names, contact info, or photos in my request

Lesson 6 Building with real AI Back

Date _____ Group _____ My nickname _____

Write what you predicted and what you saw separately. Leave anything not seen yet as not checked yet.

4 What did you actually see?

☐ App made this lesson ☐ Ready-made example ☐ Couldn't run it

Tool name or example source _____ If unsure, write "don't know."

Check I did	Actual result and my call
Right/wrong answer pick	
Repeat clicks	
Restart	

5 Write a fix request

What happened and the expected result

_____

Actual result and what to change

_____

What to keep and what to check after the fix

_____

6 Tell AI's help from my own judgment

What AI helped with and what I checked myself

_____

_____

Why copying a request doesn't mean it's done

_____

☐ I left unrun items as not checked yet ☐ I kept tools and observations separate

Lesson 7 A friend tries it Front

Date _____ Group _____ My nickname _____

Today's task Hear a friend's observations, improve one message or link, and recheck with the same actions.

Opening 5 min → Activity 30 min → Wrap-up 5 min

Open mission A better story from a friend's words

1 Work to try and roles

Work title and who will use it

_____

First 10 min ☐ Driver A ☐ Observer B / Switch roles for the next 10 min

2 Predict before your friend clicks

What friend will do	Scene or result I predict

3 Write what you actually saw

What did your friend click, and what screen appeared?

_____

_____

Where did your friend pause or get confused?

_____

_____

Lesson 7 A friend tries it Back

Date _____ Group _____ My nickname _____

Write what you predicted and what you saw separately. Leave anything not seen yet as not checked yet.

4 Share feedback with your friend

I clicked ___ and saw ___ I got confused by ___

_____

_____

5 Pick one idea, improve, and recheck

Feedback to use and what to fix

_____

_____

Why I fixed it and what to keep

_____

_____

Use again with same actions	Actual result

6 Say why you chose that feedback

Why you don't have to use every idea as is

_____

_____

☐ We switched roles ☐ I kept friend feedback and my checks separate ☐ Version saved

Lesson 8 Use it on a new problem Front

Date _____ Group _____ My nickname _____

Today's task Build a timer for a new user and conditions, explain checks and how it works, and gather your work.

Opening 5 min → Activity 30 min → Wrap-up 5 min

Open mission Start again, as many times as you like

1 A new task, different from the example

Make a 20-second timer for a friend doing exercise. It can pause and go on, and show a rest message once at the end. Reset should stop it at 20 sec.

Two conditions different from the example

_____

_____

2 My request and done conditions

One-sentence build request

_____

_____

Two conditions that mean it's done

_____

_____

3 Prediction before running

Wait after pausing: ___ After reset: ___

_____

_____

Lesson 8 Use it on a new problem Back

Date _____ Group _____ My nickname _____

Write what you predicted and what you saw separately. Leave anything not seen yet as not checked yet.

4 Check with the new conditions

Check action	Expected result	Actual result
Set 20 sec, then start		
Pause · wait · resume		
Wait after 0 sec		
Reset, then start again		

5 Explain and apply it to other apps

How are pause and reset different?

_____

_____

Checks I can use in other apps and conditions to change

_____

_____

6 Finish your process portfolio

Main work title _____ Version showing fix reason _____

☐ Prediction vs. actual ☐ Before/after fix and why ☐ How it works ☐ Help I got

☐ I gathered 8 lessons of worksheets ☐ Main work portfolio ☐ JSON backup

Explain using each work's portfolio and this worksheet. It's OK to leave unchecked items as they are.

Extra lesson If-then rule app Front

Date _____ Group _____ My nickname _____

Today's task Add an "if..." condition to a value that buttons change, then find and fix a message hidden by the order of conditions.

Opening 5 min → Activity 30 min → Wrap-up 5 min

Open mission Huh? The best message never shows!

1 What the app remembers, and its conditions

What value does this app remember, and which buttons change it?

_____

_____

2 Predict before you press

Stickers	Message I expect	Message that showed
3		
5		
6		

3 Note what seems odd

At 6, which message showed? · Which message should have shown?

_____

_____

☐ Auto check ☐ I checked it myself ☐ Not checked yet

Extra lesson If-then rule app Back

Date _____ Group _____ My nickname _____

Conditions are checked from the top. Only the first match is used.

4 Fix the order of the conditions

Before 1) 3 or more 2) 6 or more → After 1) _____ 2) _____

Why I changed the order

_____

_____

5 Check again with the same actions

Stickers	Expected message	Actual message
3		
6		
−1 at 0		

My call ☐ Same as expected ☐ Needs a fix ☐ Not checked yet

6 How are “equals” and “or more” different?

At 9 steps, press +2: does “equals exactly 10” match? · What about “10 or more”?

_____

_____

☐ Version before fix ☐ Version after fix ☐ What I saw and why
